About Mount Isa Mines

Mount Isa Mines operates two separate mining and processing streams, copper and zinc-lead-silver, to deliver natural resources that have enduring roles in our society. The site hosts the world's largest zinc resource base, as well as the biggest network of underground mine development in the world.

The site includes two copper underground mines, one zinc underground mine and two zinc open cut mines; the copper concentrator and smelter, as well as the zinc-lead concentrator, lead smelter and zinc filter plant. Together, these represent Australia's largest industrial complex.

As well as the Australian market, our products are exported to countries throughout Asia, Europe and the UK, contributing billions of dollars to the Australian economy every year. We provide work for almost 5,000 employees and contractors and are dedicated to supporting local people, local businesses, and creating strong links between our operations and the city of Mount Isa. We do this through generous contributions to local health, education, cultural and capacity building initiatives and the funding of vital public services and infrastructure development projects. Since 1924, our operations have been at the heart of life in 'the Isa'. For more information, visit www.mountisamines.com.au.
